#### Part 1 – Seeking Solution 4 min

We have completed 4th session.

After this session 3 students shared some concern

He said his father is headmaster in some school and expecting much more from him. He is average student, scoring around 60-65%. He is under tremendous pressure and said some time thought of suicide is coming in my mind. He said me to meet his father and also give him some solution.

He is from educated family his uncles are in foreign; his father is in some good organization. He said my big brother is in engineering, my family fulfilled all his demand like smart phone, laptop, etc but he has failed in first year. Now the expectation of family is increased. They are promising so many things to him (student) with some target but they are not fulfilling their promises because of his big brothers background.

He said whether it is good to score 85 marks in math with Ratta patti or score 60 marks by clearing concept. He is trying for good score but unable to score. His father is working as peon in same school. HM said that he is good in everything except study. He is scoring 60-65%

Kindly guide me, so that I can able to give them some solution.

I promise I will succeed in my life and business and be very being HAPPY. I will remember what you (Future me) said about Happiness. "Everyone on this world should be successful and famous in their life. It is not easy. They will realize then, that it is not their business happiness and success. They should be happy now and let success follow." To be happy is a blessing, you do not have to be successful requires effort and time.
